

HEADS UP.

ORANGE CONES. NO PHONES.

A recent survey of D.C. area drivers* shows that nine in 10 drivers use a cellphone while behind the wheel. Everyone knows that distracted driving is dangerous, but it's especially dangerous in a work zone.

Avoid close calls and put your phone down in the 395 Express Lanes work zone. Orange cones. No Phones. is a safety campaign focused on protecting workers in the 395 Express Lanes' work zone and those driving through it. Learn more at www.orangeconesnophones.com. When you see the cones, remember no phones.

7 IN 10 drivers say they stop cellphone use while driving after seeing a sign advising them to do so.

78% of drivers say seeing a police officer causes them to stop cellphone use while on the roads.

54% of drivers admit to using a cellphone at least occasionally while driving.

NEARLY 3 IN 4 drivers say they keep their phones close when driving, and one in six has it in their hand.

1 IN 5 drivers have had an accident or near accident due to cellphone use.

*Online survey of 1,003 Washington D.C. area drivers who travel I-395 at least monthly was conducted by international market research firm YouGov between March 21 and March 28, 2018.
